

Quality Policy

We are RK Marine Exim, Which is into supplying and exporting of ship machinery parts procured from demolished vessels at Alang ship recycling yard, India and through a large network of verified suppliers across the globe.

We offer components in New/Unused, Used (in good condition) and Reconditioned categories, tailored to suit diverse marine industry requirements.

With experience in marine industry for years, we maintain high-quality. Each and every ship machinery parts undergo rigorous visual and technical inspection before dispatch to clients. Only those parts are supplied and exported which falls under our quality standards and reach client's requirements.

As a government-registered exporter, we maintain robust logistics capabilities to ensure timely and secure global delivery. Our continuous focus on process improvement, product integrity, and client satisfaction defines our approach to international trade.
